

General Operator Manual – AIM Packaging

1. Introduction

This manual provides essential guidelines for the safe and efficient operation of AIM Packaging machinery. It includes setup instructions, safety standards, maintenance schedules, and troubleshooting tips.

2. Safety Instructions

- Always switch off the main power before maintenance.
- Use gloves and personal protective equipment (PPE).
- Avoid touching moving or heated parts.
- Never bypass safety interlocks.

3. Machine Installation Checklist

- Verify stable surface for installation
- Ensure access to power supply and air compressor
- Align machine base and secure bolts
- Connect electrical and pneumatic lines
- Test emergency stop and safety sensors

4. Operating Modes

AIM machines offer Manual, Semi-Auto, and Fully Automatic modes. Select the mode via the HMI interface based on your production setup.

5. Startup Procedure

1. Load packaging film
2. Power on the main switch
3. Select correct product recipe on HMI
4. Calibrate sensors if needed
5. Press START to begin operation

6. Normal Operation Guidelines

- Ensure smooth product feeding

- Monitor sealing temperature and alignment
- Watch for pouch rejection or cutter jams
- Keep work area clean and film path free

7. Cleaning Instructions

- Use a soft cloth and mild detergent for cleaning stainless surfaces
- Do not spray water directly on sensors or electrical parts
- Clean rollers, jaws, hoppers daily

8. Maintenance Schedule

Daily: Clean machine after each shift

Weekly: Check tension belts, air leaks, and lubrication points

Monthly: Inspect jaws, electricals, tighten bolts

9. Troubleshooting Guide

- Machine won't start: Check main power, E-stop switch
- Film feeding error: Realign film roll or sensor
- Poor seal: Adjust temperature or pressure
- Pouch misalignment: Recalibrate photocell

10. Warranty & Support

Standard warranty covers manufacturing defects for 1 year. Contact AIM Packaging for technical support, spare parts, or service scheduling.
